Dear Sirs:

Notice is hereby given that Immunocorp, located at 1582 W. Deere Ave., Suite C, Irvine, CA 92606 has marketed a dietary supplement under the brand name Immutol®. The label makes no structure function claims. The company website Immunocorp.com makes the following statements that Immunocorp believes to be compliant with allowed structure function claims:

GET IMMUTOL®. Each capsule contains 375 mg of the most potent natural immune supporting substance on the planet, highly purified Norwegian Beta-1,3/1,6-Glucan (NBG). Here's why NBG is superior to all other glucans:

Leading immunologists believe oral ingestion of Beta 1,3/1,6 Glucan (extracted from the cell walls of baker's yeast) is the best way to safely support your immune system. In fact, NBG's efficacy and safety has been documented in more studies than any other natural product that supports the immune system. In short, when it comes to Beta 1,3/1,6 Glucan, NBG is number one.

Because it can support your immune system, IMMUTOL® acts like an insurance policy against changes that compromise your immune system. You might say that IMMUTOL® helps an already good army to become a great army whose sole purpose is to defend your health.

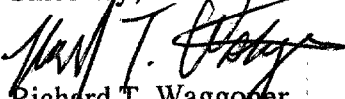

Can IMMUTOL® be taken for a specific disease?

NBG supports the healthy functioning of your immune system by activating your macrophage cells. This means that IMMUTOL® does not fight a specific disease directly, but rather helps to make your most powerful disease fighter (your immune system) function at an optimal level.

Recent research confirms that optimal immunity support is a direct result of consistent, long-term use of the world's most proven, most powerful immune system supporter--IMMUTOL®!

The undersigned certifies that the information contained in this notice is complete and accurate and that Immunocorp has substantiation that its website statements are truthful and not misleading. Pursuant to: 101.93(a)(1).

Sincerely,

Richard T. Waggoner
CEO Immunocorp
